

SOFWERX

State College of Florida Foundation, Inc. STEM Event & Workshop

21 October 2023

Event Outcomes

SOFWERX, in partnership with the State College of Florida Foundation, Inc. and the FIRST® LEGO® League, hosted a STEM Event & Season Kick-Off meeting. The FIRST® LEGO® League's mission is to nurture early STEM engagement and exploration in youth, fostering these skills throughout their academic journey. Starting from the Discovery phase, progressing to Exploration, and culminating in challenges, students grasp fundamental STEM concepts, gain proficiency in engineering design principles, explore avenues for involvement in the STEM community and with SOFWERX, and apply their knowledge to an exciting upcoming competition. This initiative promotes the growth of our community by instilling a culture of continuous learning, building confidence, and honing teamwork abilities among our youth.

- The event hosted 224 attendees
- At the event, SOFWERX staff conducted an instructive session on the core principles of the engineering design process and led four separate breakout sessions featuring diverse, hands-on STEM activities.
