

3D Geospatial Series: Tech Sprint II – OGC CDB 2.0

06 Jul-30 Sept 2020

Event Outcomes

SOFWERX, in concert with USSOCOM Program Executive Office Special Operations Forces (SOF) Digital Applications (PEO-SDA), continued in a 3D Geospatial Tech Sprint Series designed to encourage virtual collaboration among software engineers and geospatial experts working to enhance 3D data production and dissemination. The series was designed to stimulate advances in 3D geospatial data compatibility and promote interoperability between Modeling & Simulation and Mission Command systems, providing decision support to Special Operations Forces.

- Out of 28 submissions, USSOCOM selected 8 individuals to represent their organizations.
- During the virtual Tech Sprint, all prototype, experimentation, and technical integration testing was conducted.
- Participants will continue to work on the engineering and final report for USSOCOM review.
