

**SOFWERX**

# Armed Forces Communications and Electronics Association (AFCEA) High School STEM Field Trip

14 April 2022

## Event Outcomes

SOFWERX hosted 70 Hillsborough County students from the Armed Forces Communications and Electronics Association (AFCEA) High School Cyber Security Outreach Program for a tour and mock Collaboration Event (CE). AFCEA is engineered to educate, foster, and cultivate a willingness to commit to a life-long journey in defending commercial, academia and government interests from cyberspace threats.

- Students were briefed on the SOFWERX mission and participated in an interactive tour of the facility.
- They were challenged to define limitations of a Zero Trust Network, discuss the benefits of using one, and develop a high-level diagram of the architecture components.
- Each team presented their solutions and were judged by a panel of SOFWERX engineers and a JSOU representative.
