

USSOCOM Army Additive Manufacturing Community of Practice Capability

8 January 2018

Event Outcomes

On 08 January 2019, SOFWERX, in collaboration with USSOCOM, hosted a strategic USSOCOM Army Additive Manufacturing Community of Practice (CoP) collaboration event to establish a more formal organizational structure with defined roles, initiate strategic plans for “execution” of Army Additive Manufacturing activities and initiate a strategic messaging campaign.

- 16 Government attendees ideated and collaborated to make improvements to the following categories:
 - Purpose, function and scope of the Community of Practice
 - Structure of the Community of Practice moving forward
 - Roles/responsibilities for personnel within the Community of Practice
 - Strategic partnerships the Community of Practice should pursue and how
 - Strategic messaging for Community of Practice activities (internal and external)
 - Initiate discussions regarding resourcing of Community of Practice activities
