

# Aggies Invent

## 8-10 November 2019

On 8-10 November, SOFWERX, in collaboration with USSOCOM, participated in Aggies Invent, a 48-hour intensive design experience where students in multidisciplinary teams push their innovation, creativity and communication skills. The concept was to gather interested students, seed the event with potential needs (medical, energy or others), allow the students to self-select teams, give them access and support at the design center, and have them attack the ideas to create prototypes in 48 hours. Each event was designed in collaboration with industry and faculty.

## Event Outcomes

- Over the course of 48 hours, 60 students formed teams of 10 to ideate and prototype proof of theory solutions to 16 current Warfighter challenges.
- Representatives from USSOCOM and SOFWERX participated as subject matter experts and team mentors.
- Winning Teams:
  - 1st Place: FodBot
  - 2nd Place: D.O.G.
  - 3rd Place: Y9K
  - Honorable Mention: Maintain AR
