

Aggies Invent

13-15 October 2017

Nine teams of four to seven students collaborated in the “Aggies Invent Challenge” to find solutions for provided Warfighter problems:

Hack, Breach, Bang, Clear, Y.E.S., Wrecking Ladder, MonoMap, Drone Swarm Delta, Data Sculptors, Open IFF, Auto Drone, and Sea Y’all.

These fifty-two students participated in the 48 hour hackathon on the Texas A&M University Campus from the following degree programs:

Electrical Engineering, Mechanical Engineering, Chemical Engineering, Biomedical Engineering, Industrial Engineering, Computer Science, and Business.

Event Outcomes

The first place team, Sea Y’all, was awarded \$1,000 for their creation of a configurable boat seat that modifies to form a seat, stretcher, and a ladder.

The mission of SOFWERX and USSOCOM were promoted to the College Station, TX area.

Due to the success of the event, SOFWERX has been invited back for a return visit in the near future.
