

PEO-FW Route Replanning Industry Day

22 - 23 February 2017

Event Outcomes

PEO-FW conducted a two-day Aircraft Route Replanning Industry Day event at the Doolittle Institute in Fort Walton Beach, Florida. Over sixty stakeholders from Government, Industry, Academia, and Foreign partners collaborated in this successful event to explore the realm of the possible as it pertains to the topic of mission automation. The goal for this collaboration event was to pull together different ideas and perspectives to help facilitate rapid fielding of capabilities on all PEO-FW SOF aviation platforms.

- Identified the right focus, market segment, and Technical Readiness Level 6+ technology systems
- Invited 10 Industry vendors for 1-on-1 solution briefs to HQ AFSOC users
- Conducted AFSOC to Industry cross-talk on route replanning capability gaps
- Industry vendors received an AFSOC perspective to their route replanning technology proposals
- Selected five route replanning systems for follow-on Software Integration Lab testing with the potential for top candidates to move forward with a flight demonstration of capability
