Combatant Craft Heavy Mark 2 Capability Collaboration Event (CCE)

27 - 28 March 2019

Event Outcomes

On 27 – 28 March, SOFWERX, in collaboration with USSOCOM PEO-Maritime and PM-Surface Systems, hosted a Capability Collaboration Event focused on assessing the current state-of-the-art, industrial capability to design a new craft, or modify an existing design, to meet the requirements for the Combatant Craft Heavy Mark 2 (CCH Mk 2). Participants were given an opportunity to collaborate with Government, Industry, Academic, and Laboratory partners to further understand the needs of PEO-Maritime and PM-Surface Systems.

- 62 representatives from Government and Academia attended
- Participants engaged in direct dialogue with Warfighters and Government subject matter experts related to four technology problem statements:
 - Craft Designs
 - Power Generation and Management
 - Payload Launch and Recovery and Handling/ Stowage
 - C6ISR
