EVENT

# Countering Weapons of Mass Destruction (CWMD) Industry Capability Collaboration Event (CCE)

20-21 February 2019

Event Outcomes

SOFWERX, in collaboration with the USSOCOM, Joint Program Executive Office for Chemical Biological Radiological and Nuclear Defense (JPEO CBRND), and the U.S. Army Combat Capabilities Development Command Chemical Biological Center, hosted a capability collaboration event to identify Countering Weapons of Mass Destruction technologies available now, under development, or anticipated to be developed.

- Over 150 representatives from Government, Industry, Academia, and National Laboratories participated.
- Participants engaged in direct dialogue with Warfighters and Government subject matter experts related to nine CWMD technology problem statements.
- Attendees ideated and submitted over 200 technologies, techniques, and points of contact that could potentially satisfy near-term prioritized CWMD needs.
