

FOSOV Autonomous and Automated Ground Mobility Capability Collaboration Event (CCE)

19-20 February 2020

Event Outcomes

SOFWERX, in collaboration with USSOCOM PEO-SOF Warrior (SW), hosted the Family of Special Operations Vehicles (FOSOV) Autonomous and Automated Ground Mobility Capability Collaboration Event (CCE). The event explored tactical, SOF Autonomy and Automation Ground Mobility 0-5 year gaps, analyzed and defined future concepts and prioritized operational use cases which will be used to develop future SOF Autonomous and Automated Ground Mobility requirements.

- 44 Representatives from Government, Industry, Academia and Laboratories attended and participated in the event.
- SOF mobility operators engaged in direct dialogue about the operational application(s) of autonomous and automated ground mobility in a tactical environment with invited members of Industry, Academia and Laboratory subject matter experts.
- Teams developed operational use cases designed to identify and challenge future autonomous and automated SOF mobility assumptions. Those scenarios will be used to help prioritize future SOF autonomous and automated mobility requirements.
