

PEO-SW FOSOV Government Only Collaboration Event (CE)

18 July 2023

SOFWERX, in collaboration with USSOCOM PEO-SOF Warrior (PEO-SW), Family of Special Operations Vehicles (FOSOV), specifically the Non-Standard Commercial Vehicles (NSCV) Program, hosted a series of events, starting with a Government Only Collaboration Event, designed to frame open challenge statements for Industry and Government labs. USSOCOM NSCV Program worked to define the challenges that frame the future of integrated portable and adaptive Information Technology (IT) and Communications (Comms) kits. Over time, competing and emerging requirements have driven IT and Comms kits to increase in complexity and cost at the trade-off of Special Operations Forces (SOF) mission flexibility.

Event Outcomes

- 21 Government representatives participated
- Participants were divided into 3 groups to discuss current limitations and ways to overcome limitations
- The groups developed 8 problem statements that will be turned into reference materials for a future Collaboration Event (CE), followed by an Assessment Event (AE)
