

Florida College Academy Soldering Event

03 December 2021

SOFWERX staff and interns led an educational activity at Florida College Academy involving soldering safety and techniques. Students worked in small groups to construct their own circuits using electrical components and solder.

Event Outcomes

- 16 middle school students participated in soldering simple series circuits to illuminate LEDs.
- Safe equipment handling and soldering skills were taught and demonstrated for the students.
- SOFWERX looks forward to continuing STEM collaboration with Florida College Academy in future events.
