S.T.E.M.

Girls S.T.E.M. Day 2018

26 October 2018

SOFWERX hosted students and volunteers from Young Middle Magnet School for a girls STEM day. All participants were taught about health, coding, drones, and more through hands-on activities. During lunch, an engineer & active duty service women addressed over 100 girls in regards to their current jobs and the endless possibilities for the future of women in STEM. The girls left SOFWERX with a better understanding of real world applications for STEM and a vision of what their future could look like if they continue with STEM education.

Event Outcomes

- 107 middle school girls participated.
- 34 parents and teachers volunteered to chaperone and participate in STEM events.
- 3 guest speakers presented short lectures during lunch.
- 14 volunteers representing Bay Care, Florida Department of Health, code.org, and SOFWERX conducted engaging activities.
