

Hackabull

24 March 2019

SOFWERX was proud to be a sponsor and attendee of Hackabull at the University of South Florida (USF). This hackathon united hundreds of coders, designers and thinkers from multiple colleges across the United States. Hackers were allotted 24 hours to design and code various projects involving application building, robotics and hacking. Students brought their concepts to life in front of a panel of elite judges for the chance to win prizes and the title of the reigning Hack-a-Bull champion. In the midst of intense collaboration, Hack-a-Bull also hosted a career fair where SOFWERX had the opportunity to inform event attendees of our mission and ways to get involved.

Event Outcomes

- SOFWERX met with many students to discuss coding and hacking opportunities offered at SOFWERX
- Several students joined the SOFWERX non-traditional ecosystem
- SOFWERX received widespread interest in solving challenges for the Warfighter
