

Human-Centered Design for Global Situational Awareness Event

17 Feb-01 July 2021

SOFWERX, in collaboration with USSOCOM PEO-SOF Digital Applications (PEO-SDA), conducted a series of design sprints to implement visionary innovation into the design of user experience with transformational decision support. Subject Matter Experts (SMEs) contributed to technology roadmap development, experimentation, and Artificial Intelligence (AI)-enabled capabilities to unify the SOF enterprise via a Common Operational Picture (COP) providing global situational awareness.

Event Outcomes

- Out of 126 submissions, USSOCOM selected 5 Industry SMEs and 2 Government SMEs to participate.
- During the 2 design sprints, all prototype, experimentation, and technical integration testing was conducted.
- Participants finalized and presented their final reports for USSOCOM review.
