

## ISSA/Infragard Meeting

8 December 2017

ISSA and Infragard held a joint meeting to cover topics regarding cyber security and how to be prepared to handle a malicious cyber attack. There were 155 attendees registered to attend the event and 30 extra tickets were released the morning of the meeting. 7 companies sponsored the event, who also showcased their capabilities in the SOFWERX Underground facility for those attending the event.

## Event Outcomes

- The ISSA/Infragard meeting covered topics including cloud security, cyber crime trends, unsupervised machine learning, and hunting advanced persistent threats.
- Those presenting spoke about the importance of each of the areas of interest, as well as how to incorporate cyber security practices into the professional world.
