Joint Terminal Attack Controller (JTAC) Capability Collaboration Event

24 - 25 July 2018

Event Outcomes

On 24-25 July, SOFWERX, in collaboration with USSOCOM, hosted a Capability Collaboration Event to identify Joint Terminal Attack Controller (JTAC) technology, analyze limitations, and explore opportunities to overcome limitations. There was also a session to discuss training shortfalls and the technologies that may be leveraged to mitigate these shortfalls to increase throughput and effectiveness.

- Over 60 attendees representing Government and Industry were present.
- Participants identified JTAC limitations and opportunities to overcome limitations.
- Participants reviewed current and future JTAC technologies that allow for quicker and more cost-effective training to include:
 - Gaming
 - Virtual Reality
 - Dome Environment
 - Augmented Reality/Mixed Reality

Participating Companies:

- Virtual Reality Rehab Inc.
- Design Interactive
- Bohemia Interactive
- Ravenswood Solutions
- Naval Special Warfare
