

ASSESSMENT
EVENT

PEO-Maritime Undersea (PEO-M) Fault-Tolerant Battery Technology Assessment Event (AE)

07,14,21 February 2023

Event Outcomes

SOFWERX, in collaboration with USSOCOM Program Executive Office-Maritime Undersea (PEO-M), hosted an Assessment Event (AE) to identify solutions for submersible vehicle programs fault-tolerant battery technology. In June 2021, SOFWERX hosted a Virtual Collaboration Event (CE) to (1) promote specific areas of interest, (2) encourage an early exchange of information, and (3) provide an opportunity for both Government and Industry to gather more information prior to the release of a formal solicitation. The objective of PEO-M for this AE was to find both mid (2025) and long (2030) term solutions for energy for the PEO-M submersible vehicles.

- 31 Industry participants from 12 organizations presented their technology briefs to the Government team
- Out of 14 submissions, 11 capabilities were selected
- A team of 4 USSOCOM representatives listened to technology briefs and had one-on-one conversations with Industry
- USSOCOM will make their decision as to which organization(s) they will choose to move forward with within 3 weeks
