

PIA & Labs Capability Collaboration Event

5 December 2018

On 05 December, SOFWERX, in collaboration with USSOCOM and various Laboratories, hosted a Partnership Intermediary and Lab collaboration event. Partnership Intermediaries and their sponsoring Labs, or Labs who do not have a PIA but wished to attend for visibility, were invited to participate in the event to help determine the most impactful and mutually beneficial ways to create enduring partnerships, communicate effectively across the enterprise and create proper incentivizations.

Event Outcomes

- 54 PIA's, Laboratories, and Other Government Users attended the collaboration session to make improvements to the desired categories:
 - Determine the most impactful and mutually beneficial ways to create enduring partnerships.
 - How best to communicate effectively across the enterprise.
 - How to create the proper incentivizations for both PIAs & Labs.
- Participants divided into small working groups to identify current limiting factors and ways to overcome those factors between PIA's and Laboratories.
- SOFWERX is working with a small coalition of the willing to implement some of the tools and applications that were highlighted during the event.
