Digital Privacy

14-15 March 2017

Tech Talk is an event to provide insight into the ever changing world of technology . This event was focused on Digital Privacy to protect military or federal LEO family members in the digital environment.

Threat Hunting - Thinking About Tomorrow
 Tazz (BSidesCharm 2017)

Event Outcomes

On 14 & 15 March SOFWERX hosted a top U.S. OSINT hacker. "Tazz" aka Divine Intel LLC presented to the command on how to protect your military or federal LEO family member in the digital environment. She also demonstrated a number of open source tools and demonstrated how these tools could be used in the field to support a wide array of research projects and investigative efforts. We are sincerely grateful for her expertise and her frank discussions concerning the open source threat to personal security and privacy. SOFWERX will continue to team with Tazz on a series of future OSINT initiatives and we hope to have her visit with us again soon!
