

TECH TALK

September First Friday

09 September 2016

First Friday is an event to expose participants to University/FFRDC, Lab and Industry Partner Technologies, Capabilities or Research Areas of interest. First Friday is concluded with a social meet and greet with all participants.

Now known as Tech Talk Thursday

Event Outcomes

SOFWERX invited presenters to showcase their current technologies, capabilities or research areas that could be of use or interest to USSOCOM.

Georgia Tech Research Institute: Greg Kiesel, Principal Research Engineer, showcased his research on planar configurable antennas.

Stacato: Gil Limonchik, CEO, presented the current information and capabilities Stacato is working on in regards to STACATO's NFMI Wireless Personal Area Network and headset system.

University of South Florida: Dr. Steve Sadow, Professor of Electrical Engineering, focused his presentation on the use of silicon carbide for advanced applications.
