For Innovation and Recognition in Science and Technology Lego League Jr. Event

3 May 2018

Event Outcomes

On 3 May 2018, SOFWERX hosted the FIRST Lego League Jr. 2018 Expo. The 2018 season, coined “Aqua Adventure,” challenged students to learn how SOFWERX uses water, where it originates, and the journey it takes to get to our homes.

FLL Jr.’s Affiliate Partner, Desh Bagley, and her organization also provided four STEM related activity tables for the students to utilize their time while interviewers were engaging each team table.

- Four teams from Hillsborough County showcased their robotic Lego models along with a comprehensive “Show Me” poster outlining their project from start to finish.
- Teachers, parents, friends, and SOFWERX staff had the opportunity to discuss their project with each team.
